

The Emerging Role of Mobile Phones Healthcare

Shwetak N. Patel

WRF Endowed Professor

Allen School of Computer Science & Engineering

Electrical & Computer Engineering

Ubicomp lab

University of Washington

Director of Health Technologies

Google

Quick Research Overview

Energy monitoring

Health

Low-power wireless sensing

New interaction techniques

Personal Health Monitoring

Point of Care Diagnostics

Another Paradigm Shift in Health Care

Opportunities with Mobile Health

- New screening tools
- Population health
- New discoveries in diagnostics
- Improvement in treatment

- Possibly leapfrog traditional approaches through global health applications

Continuous Measurements

The Modern Smartphone

Mobile Health Sensing

- Using existing sensors on mobile phones for health sensing

Using Mobile Phones for Diagnostics

Pulmonary

Spirometry

Cough analysis

Blood screening

Hemoglobin

Bilirubin

Cardiovascular

SP0₂

Blood pressure

Disease Specific

Sleep

Osteoporosis

Measuring Lung Function

- Spirometry
 - Mainstay of monitoring respiratory conditions (Asthma, COPD, CF)

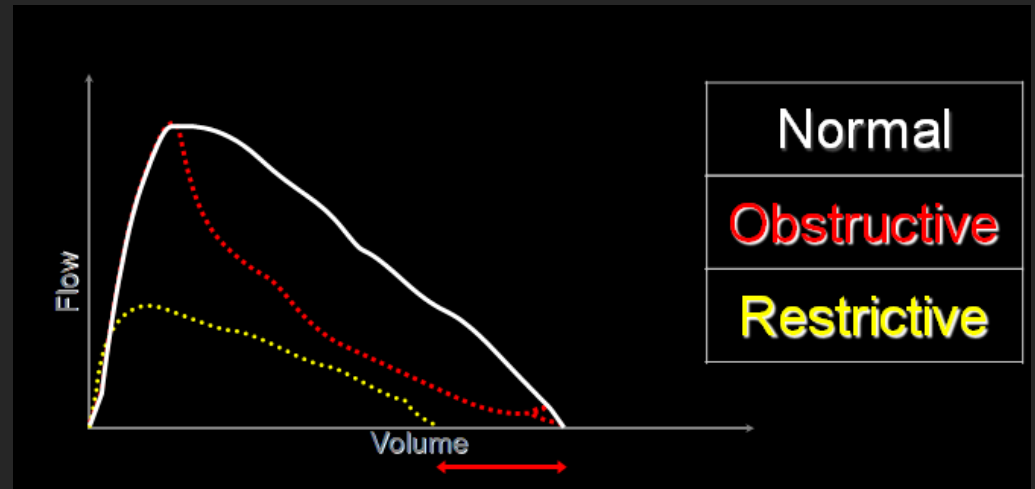

Clinical Spirometers

Home Spirometer

Measuring Lung Function

SpiroSmart: Mobile Phone Spirometer

- No additional hardware needed
 - All done with software

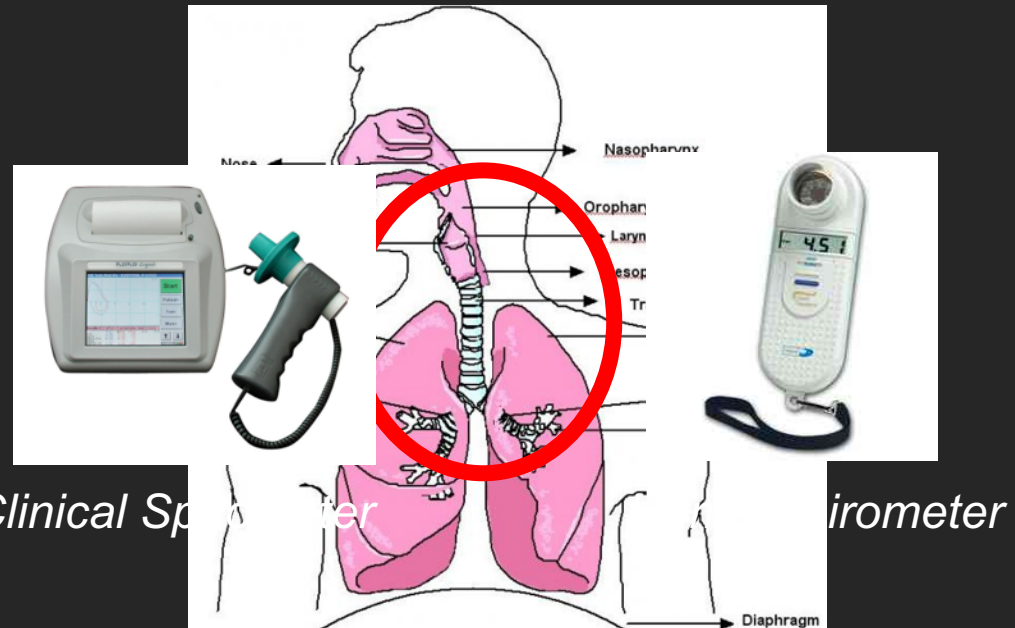

SpiroSmart: Mobile Phone Spirometer

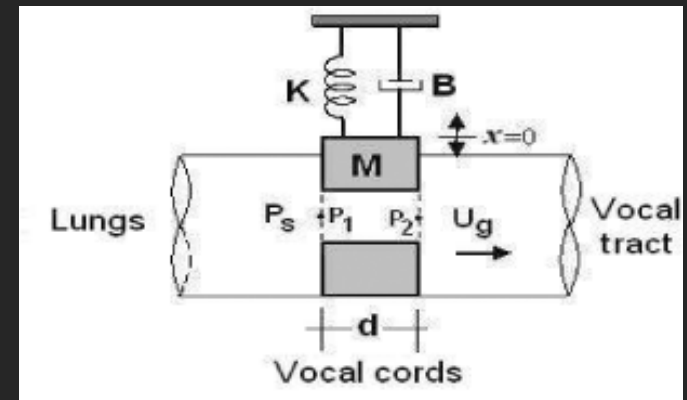

How it Works

- Traditional spirometers use a flow sensor (e.g., turbine) – we only have the microphone
- Vocal tract resonances to infer flow
 - The “noise” in speech recognition

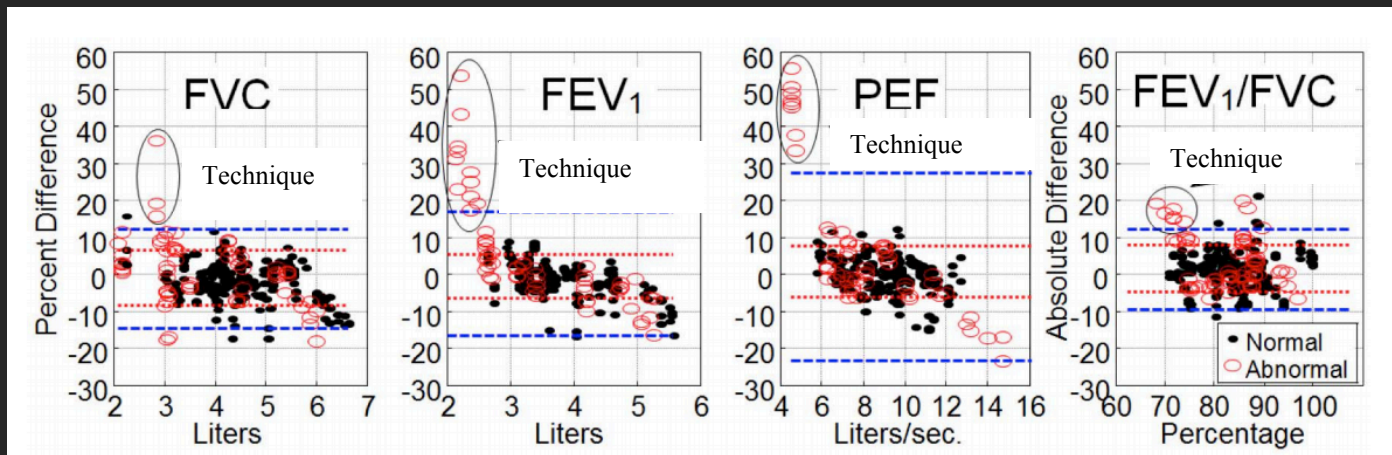

Vocal tract model

SpiroCall

SpiroSmart and SpiroCall Clinical Trials

Detecting and Studying Cough

- Cough is a common symptom, but not quantifiable
- Might be useful for studying the spread of disease
- Cough may tell us a lot about a disease
- Human ears miss subtle characteristics

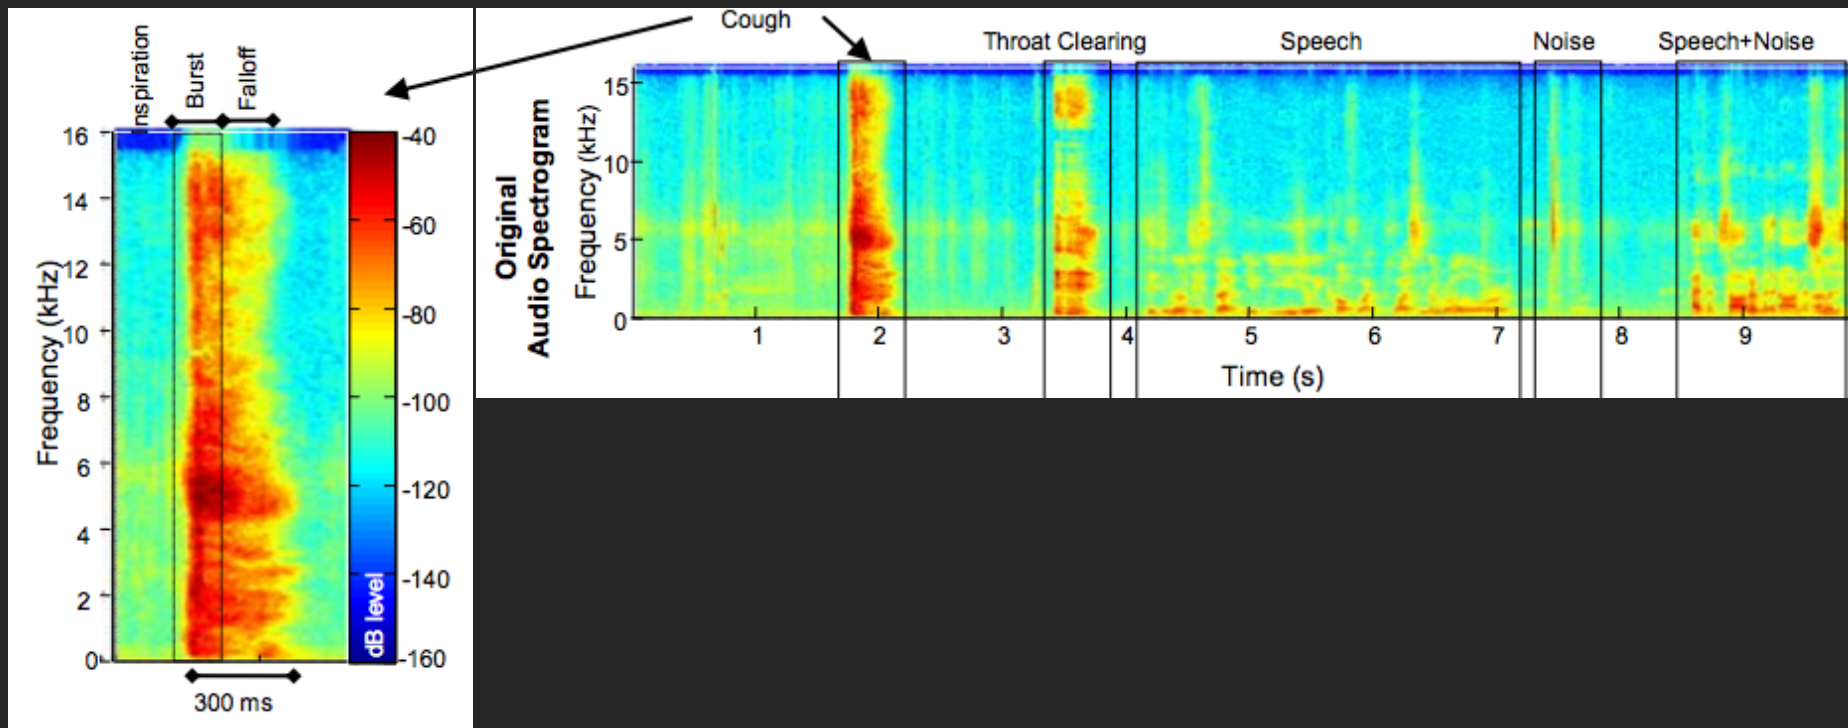

Sound Analysis from Microphones

- Frequency based analysis with associated glottis model

Sound Analysis from Microphones

- Frequency based analysis with associated glottis model

Studying Tuberculosis

- Highly infectious lung disease
- The spread of TB spreads is still being studied
- Coughing is a major symptom

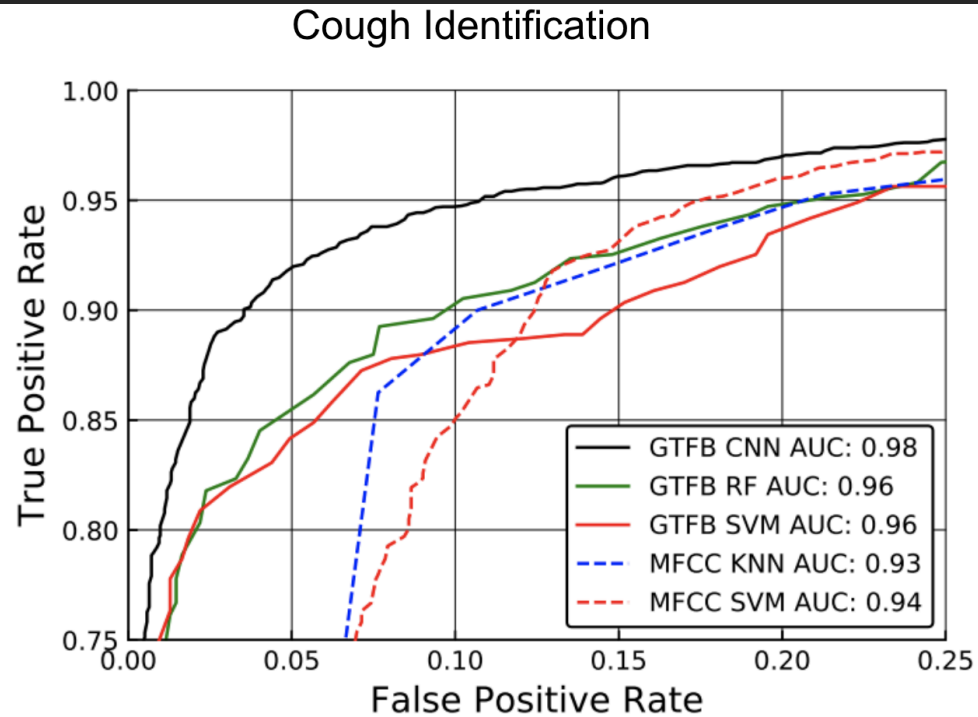

BILL & MELINDA
GATES *foundation*

TB Study in South Africa

Cough Identification

BiliCam

- Using mobile phones to monitor newborn jaundice

Current Technology

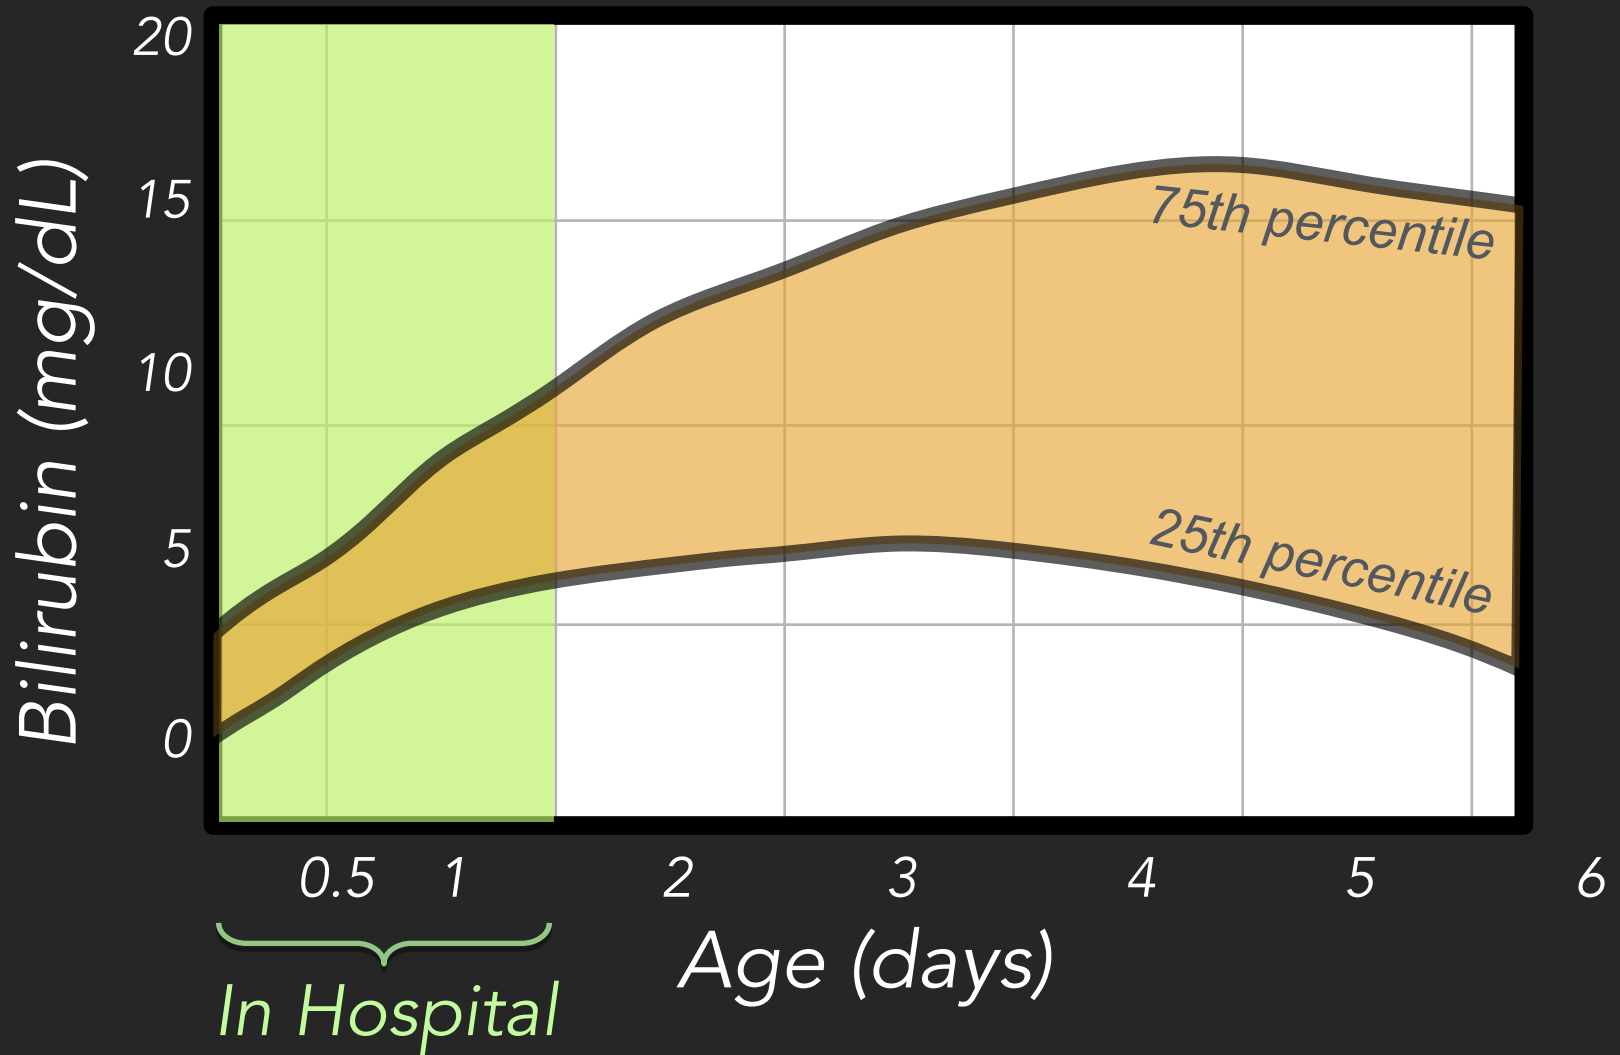

- Total serum bilirubin (TSB)

- Transcutaneous Bilirubinometer

Bilirubin Levels

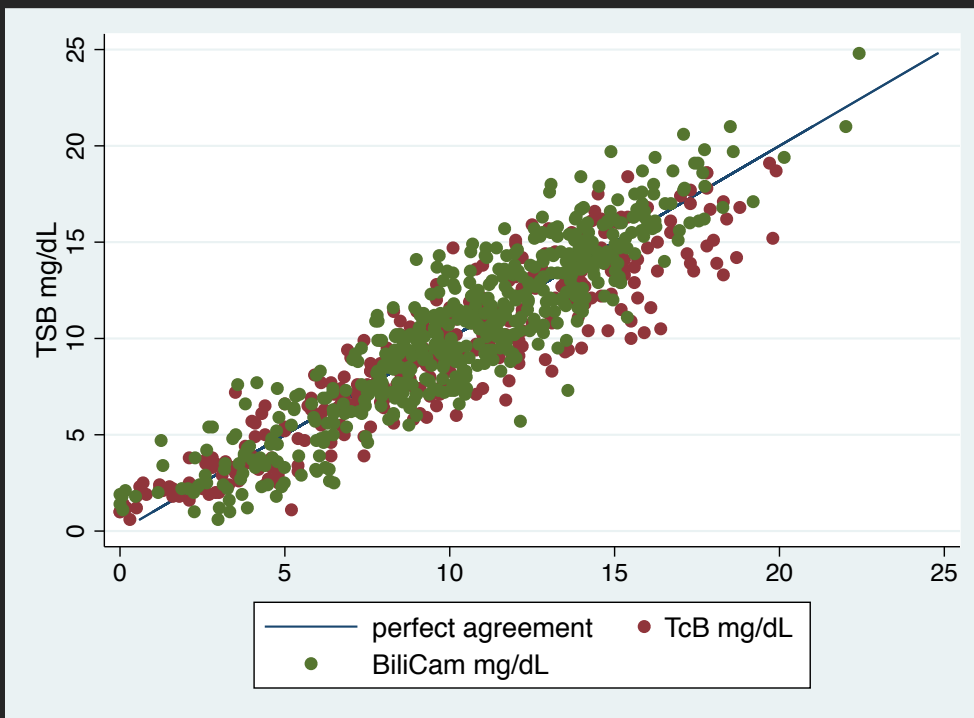

Absorption Properties of Bilirubin

Relative Bilirubin
Absorption Probability

Trial of 530 Newborns

BiliCam

0.91 correlation

TcB

0.92 correlation

Bilirubin in Adults: Pancreatic Cancer

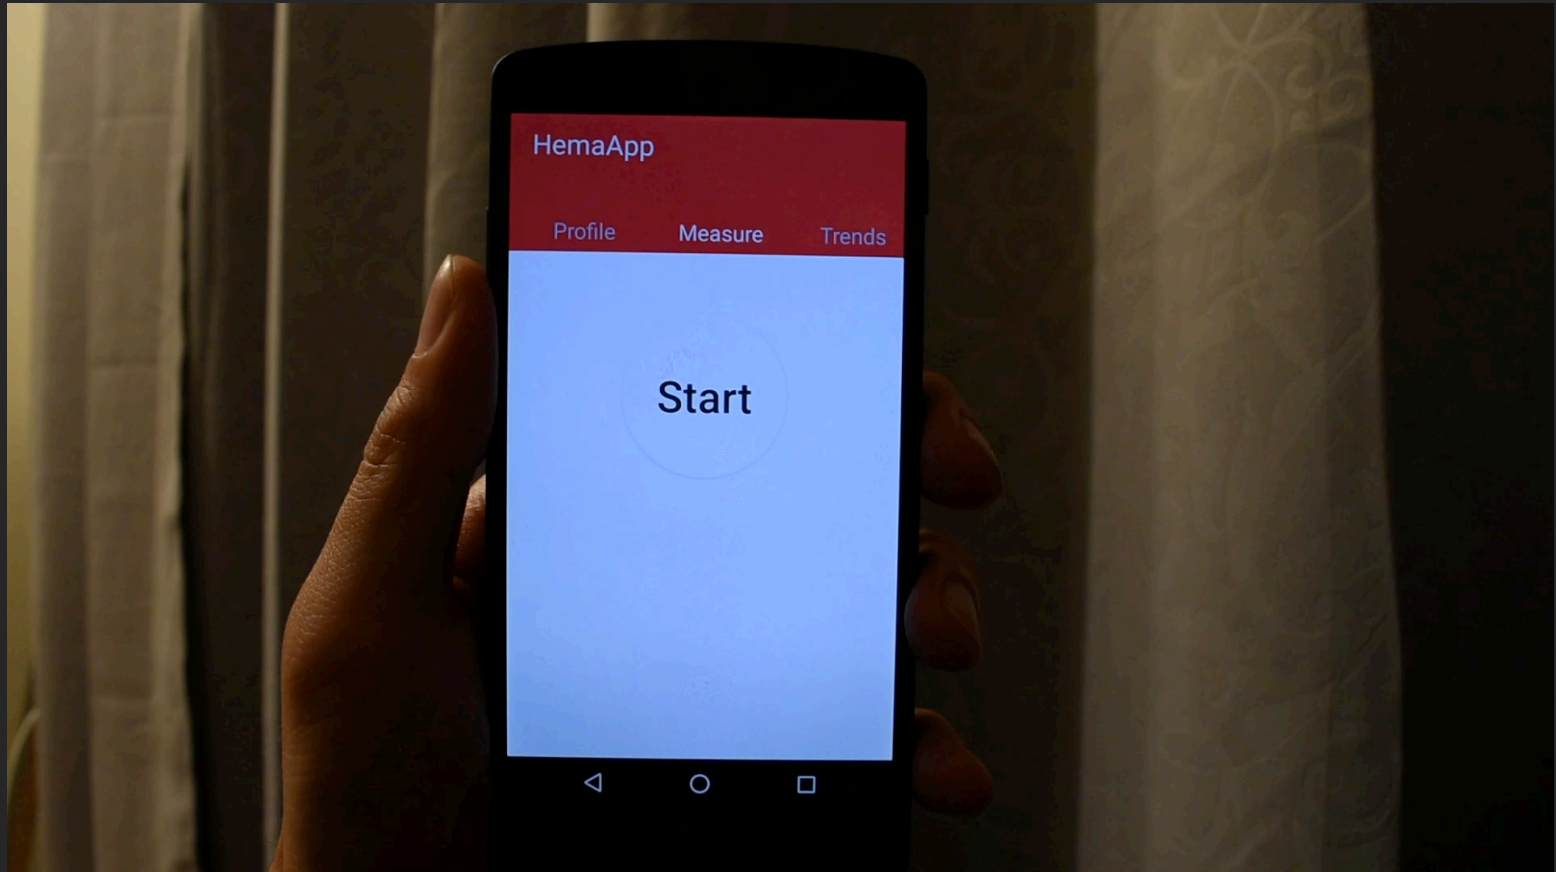

Observable Jaundice in the Sclera

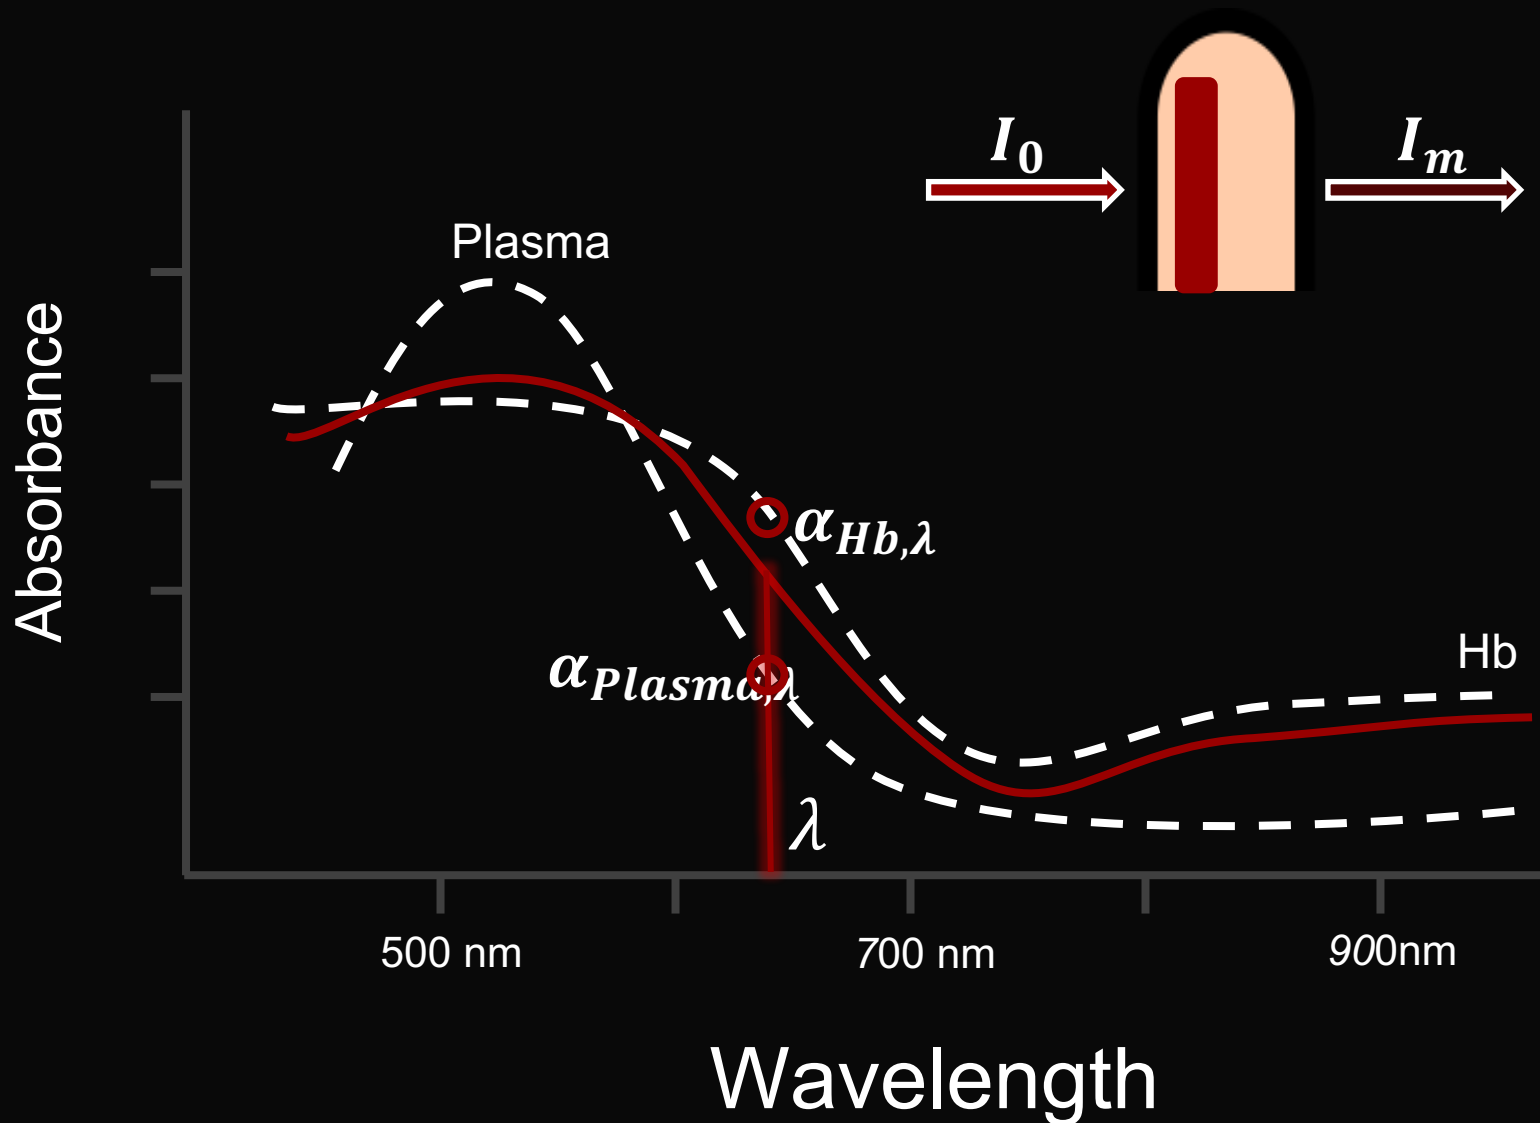

Mobile Phone Hemoglobin

Mobile Phone Hemoglobin

Hemachrome Analysis

Isolate Blood Absorption

Hemachrome Analysis

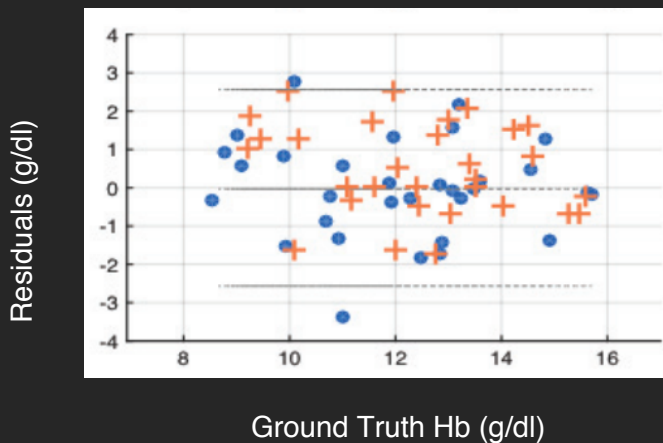

Evaluation

● **HbApp**
0.81 correlation

■ **Pronto**
0.82 correlation

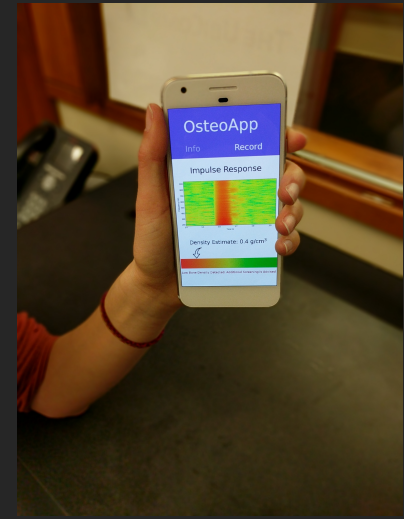

Peru Deployment

OsteoApp

- Inferring bone density with resonance tracking for osteoporosis

OsteoApp

Considerations in Mobile Health

- Regulatory
- Safety and trust
- Patient - provider interaction
- Inform new advances in medical devices

- Still need to take into accounts other factors such as social determinants

Advice to the Young Researchers

Thanks!
